MATERIAL SAFETY DATA SHEET

Dear Customer:

Attached is a Material Safety Data Sheet (MSDS) for our product, PROFESSIONAL LINE CASCADE. This MSDS was written to comply with the OSHA Hazard Communication Standard (29 CFR 1910.1200). The intent of the Standard is to protect workers in industrial situations from hazardous materials in the work place; however, the scope of the Standard covers some cleaning product ingredients.

Professional Line Cascade is "hazardous" because the mixture, when tested as a whole, is considered an eye irritant within the meaning of the OSHA Hazard Communication Standard. The effects of accidental eye contact are expected to be slight, and transient, similar to those produced by mild toilet soaps and household detergents.

Thank you for your interest in our products.
