HISTORY

Cheney Brothers roots were set in 1925, when our founder, Joe Cheney decided to supply fresh, high quality foods to hotels and restaurants in Palm Beach County. Today, the Cheney Brothers enterprise distributes throughout Florida, Georgia, the Carolinas and we export around the globe. In our fourth generation of closely-held family ownership and operation, our growth and success has been due in large part to our unwavering dedication to earning our customers' trust. We consider our customers a part of our family and our long standing relationships prove it. We are very proud to announce the very first customer signed by Joe Cheney in 1925 is still an exclusive Cheney Brothers customer to this day.

MISSION

What really sets us apart is the way we do business. As a privately-held company, our definition of success does not revolve around earnings per share but rather the ability to accommodate and exceed our customers' unique needs and expectations. The Cheney Brothers mission is to focus on taking care of our customers, doing things right the first time and making sure our promises made are promises kept.

VISION

Cheney Brothers has gone beyond foods and products to deliver the advanced technology our customer needs to succeed today and in the future. Over the past 95 years, our Information Technology Department has earned a reputation of having tremendous innovative vision. We have carefully selected technologies, processes, applications, and partnerships to provide everything our customers need to be extremely cost effective, highly sustainable and exceedingly safe. Everything we do is with the customers' needs in mind. We've listened to our customers, and have developed the specific technologies they have requested along with many other advancements they never would have dreamed of.

High Performance Technologies Accelerating Businesses

Cheney Central Online Ordering

We've covered all the bases with our user friendly software.

This service is always free to Cheney Brothers customers.

Cheney Central online ordering platform allows our customer to order from any device, including smartphones. We've covered all the bases with our user friendly software, making it easy to view orders and order status detail in real-time, view delivery times and updates, access invoices and credits, manage inventory, set multiple par levels and obtain suggested reorders, import data to create custom order guides and recipes with exact measurements, create multiple order guides for multiple accounts, use fast and easy menu costing, export data to Excel or PDF, and easily manage customer profile information. The best part is, this service is always free to Cheney Brothers' customers.

- Order from any device, including smartphones
- View orders and order status in real-time
- View delivery times and updates
- Access invoices and credits
- Manage inventory
- Set multiple par levels and obtain suggested reorders
- Import data to create custom order guides and recipes with exact measurements
- Create multiple order guides for multiple accounts
- Fast and easy menu costing
- Excel data to Excel or PDF
- Easy-manage customer profile information

The all-in-one solution for your restaurant.

Save time and money with this complete back-of-house technology.

A complete back-of-house solution for restaurants. Pulp, Cheney Brothers' custom ordering and inventory application, equips restaurants with a device that replaces the need for clipboards, invoices and recipe books.

Pulp is a restaurant inventory management software serving up simple tools for all types of operations. With Pulp, restaurants gain access to easy ordering, accounting, invoices, inventory management, POS integrations and recipe costing, all in one place. We offer software and services that can be adapted in a matter of days, comes with great training and constant access to foodservice consultants, helping your operation save time and save money.

Inventory Management

Pulp's new Restaurant Inventory Management Software makes it easier than ever for chefs and general managers to take their restaurant's inventory every time they order, instead of having to conduct one large inventory process at the end of each month or quarter. Pulp digitizes your restaurant's inventory so it's logged, saved and stored in one place and one consistent format.

Ordering

Pulp makes it easier than ever to order directly from Cheney Brothers. Chefs, owners and managers search Cheney Brothers' catalogs and add items to an order directly from their phones or computers. Plus, with Pulp, re-ordering is easy as well. Since most restaurants have a set list of times that they purchase once a week, or even several times a week, our technology allows restaurants to cut down their time and simply re-load a past order.

Accounting/Receiving

Pulp helps make all of your business processes a breeze, including your accounting and receiving tasks. Pulp's accounting software for restaurants integrates with your existing restaurant accounting software applications like Quickbooks, CTUIT, Restaurant365 and more. With one click, restaurant managers can receive products and send data to their accountant or bookkeeper in the format they need. Our inventory and receiving features together create a comprehensive picture of every single item that your restaurant purchases from the time of a purchase order, through the receiving process, storage process, and even usage.

Reporting and Analytics

See the data that matters most to your operation. Access insights about the health of your restaurant by viewing easy to understand dashboards. The answers to your most important questions about pricing, product trends, rebates and inventory are available in Pulp's customizable data interface. With business insights, leverage your restaurant's purchasing data to make key decisions about whether to join a group purchasing organization, seek contracts on high-volume categories, or optimize marketing spend on particular items. Easily break down your purchases by category to view everything you've purchased over a given time period and then sort items inside each category from high-to-low to see what you're spending the most money on.

OnePOS is a unique Point of Sale (POS) solution with all of the reliability and functionality of a traditional POS system and the features and benefits of a cloud based system. OnePOS has many built-in components which are part of its core software eliminating tricky interfaces and connections. OnePOS allows the user to utilize gift cards, kitchen displays, loyalty programs, online ordering, scheduling with full time clock management and much more. All your data can be easily accessed, updated, and reports can be generated through any web browser using oneMetrix. The mobile app allows managers and owners to see key information - live on their smartphones. Employees and managers can utilize the mobile app for scheduling and staff management.
